Learning Material Styling

Greenwood Training Company wants to present their Learningmaterial Online. They also want to apply Styling to their Learning content.

Concepts covered: CSS3 Selectors - Element Type Selector, IdSelectors, Class Selectors and Grouping Selectors

The following is the screenshot of Learning Material Styling

Why to Learn java Programming? Java is a MUST for students and working professionals to become a great Software Engineer specially when they are working in Software Development Domain. I will list down some of the key advantages of learning Java Programming: Object Oriented In Java everything is an Object. Java can be easily extended since it is based on the Object mode! Platform Independent Unlike many other programming languages including C and C++, when Java is compiled, it is not compiled into platform specific machine, rather into platform independent byte code. This byte code is distributed over the web and interpreted by the Virtual Machine (JVM) on whichever platform it is being run on. Simple Java is designed to be easy to learn. If you understand the basic concept of OOP Java, it would be easy to master. Secure With Java's secure feature it enables to develop virus-free, tamper-free systems. Authentication techniques are based on public-key encryption. Architecture-neutral Java compiler generates an architecture-neutral object file format, which makes the compiled code executable on many processors, with the presence of Java runtime system. Portable Being architecture-neutral and having no implementation dependent aspects of the specification makes Java portable. Compiler in Java is written in ANSI C with a clean portability boundary, which is a POSIX subset. Robust Java makes an effort to eliminate error prone situations by emphasizing mainly on compile time error checking and runtime checking.

Use the CSSSelectors with the given Properties and Values.

Provide the details as given in the table below.

CSS Selectors	Properties And Values
body	background color should be #00FFFF font family should be Arial font size should be 12px
h1	font size should be 2.5em
dd	font size should be 1.5em
p[title]	color should be #FF0000 font size should be 1.7em line height should be 1.5
reasons	color should be #FF0F70 font should be displayed in bold line height should be 1.5 font size should be 1.5em
description01	font style should be italic color should be #F500FF
